

Scenario: You have recently attended a halloween party. A few days later, you start to develop a cough, as well as some congestion. You feel fatigued, and think you might be developing a fever. You would like to see if this would warrant you going to get a Covid-19 test or not.

Task 1: Enter all of your symptoms into the app to see if you should get tested or not.

Task 2: Schedule an appointment in the app to get a Covid-19 Test.

Task 3: Report test results in the app to help with future studies of Covid-19 and it's symptoms.

Notes:

What changes should you make to your application?

- Incorporate school testing facilities
- Don't force people to report results

What you need to keep the same for your application?

- Keep appointment scheduling feature
- Keep symptoms pretty specific
